

Transcript of shorthand notes taken by Det. Sgt. Battye, Special Branch, of parts of a speech made by Tony WATSON at a meeting held under the auspices of the Universal Coloured Peoples Association at Speakers' Corner, Hyde Park, W.1, on 6th. August, 1967.

British imperialists and their colonial policy - today the world is having a terrible experience... According to the Western people other people don't exist. If that society is responsible for the exploitation of the coloured races and for racialism, and I must make this clear, the Anglo Saxon people are responsible for racialism...are the number one enemy of the human race. When we get rid of them it will be the better for humanity. Wherever English language is spoken there is racial laws in the constitution of that country. The Anglo Saxon way-of-life should^{be}/relegated to the toilet... I am looking forward to the day when China shall acquire maximum technological development, when European cities will come under the threat of the Chinese deterrent.... We don't want missionaries any more, we want Chinese technicians... We have seen in forty years the building of a great Russian nation. What have the English people done but pass homosexual acts to walk backwards to happiness. We are contemplating putting economic squeeze on Britain. I would like to see the Indian Government appeal to all Indian doctors to go back to India. I would like to see all English people die. The Arabs are now saying the same thing, that the number one enemy is the Anglo Saxon. When people like me and Nkrumah told them that the Englishman was no good they failed to understand, but they learned their lesson. Once our people realise that English people are the real enemy they will really understand..... It is going to be a long struggle but in the end we shall triumph... It took three hundred years to build....the British Empire upon which the blood of black men never dies - it took Nkrumah, our saviour, fifteen years to destroy the great British Empire. We destroyed it politically... When we succeed in destroying you, you will have to resort to your caves in Epping Forest. But let me tell

(WATSON continued)

you, the gold in the Bank of England comes from Africa and belongs to us. We want it back. If we cannot get it by negotiation we shall appeal to Mao Tse Tung for gunpowder. Then we shall deal with the white man accordingly... Each time we kill a white man in Africa they say we are going back to the jungle. But is not England a jungle?... Knowing that English people are stupid and knowing my people in Africa I know that I shall have to work, I decided that that work is not a very good thing so I deserted it... I know England is a very good place and that English people like to give away what they don't have...
